ABSTRACT OF THE DISCLOSURE

A multi-function processing apparatus, including: an original detection unit that detects a set original; a read unit that reads an image on the original; an image formation unit that forms an image on a recording medium in toner; a fixing unit that heats the toner image formed on the recording medium; a copy instruction unit that gives a copy operation instruction for causing the read unit to read the image of the set original and causing the image formation unit to form the image on the recording medium; and a fixing control unit that performs a first control processing for starting to raise a temperature of the fixing unit based on detection of the original by the original detection unit.
